Then we bought, at the same time, SEVEN-TY-SIX DOZEN new Teck and Puff SCARFS, elegant styles, which we offer at the same price - twenty-five cents. No other house is selling these goods for less than forty-five cents. You can see some of these goods by looking in our show window. Your County Paper.

The county paper is nearer to the copie than the city paper. It speaks

of home affairs, it upholds and advances home interests, it makes known home wants and introduces to the public home men and their capacity for useful work. It deserves the sympathy and hearty support of home people and the public-spirited men of the section in which it circulates. There is no agoucy among men capable of doing so much good in temporal affairs as a well-edited and neatly printed paper. The State itself should favor the county newspapers as much as it can without detriment to the public interests, and every man interested to any extent in the actvancement of the county and section in which it is published, should aid the county-paper in every way possible, and do so on the ground of public interest. No man can edit a paper and please all men. If he attempts so foolish a thing, he will prove a failure, and for this reason every editor must be allowed to cherkh and promnigate his own ideas, as well as to give publicity to the ideas of others concerning public ailairs. No county ever lost a dime, and hundreds of them have been greatly advanced,

But with all their despicable our oil by the barrel—then there may progress, when the decision of war or peace would determine what their respective movements should be. Notwithstanding the agreement, a bloody battle was fought between the Afghans and Russians. The question, as yet undecided, is, which party was to blame for it? This question is what Christian IX, King of Denmark, will, It is believed, be called upon to decide, shall negotiations proceed peacefully until the time when his decision shall

be in order. As he is the lather-in-law of the helrapparent to the throne of England, and of the Czar of Russia, there is propriety in his selection for the decision indi-

Christian IX has been King of Denmark since November 15, 1863, when his predecessor, Frederick VII, died. We have another industry marching up to the front in this section, that seems in a fair way to become more popular than sheep-raising. It is the long-neglected goat. There are several flocks of improved blood in this county, that have so far paid a much better profit than sheep. They require much ess care and are so much hardier that the profit is not only greater but the government of his special friends. It is from a street lu Bagdad. Cambric is tory.
